SECTION A. INVESTOR T&Cs

1. DIRECTORY SERVICES

The Site is intended to provide you with certain information from Issuers regarding the self-certification of their Products as labelled covered bonds. The requirements of the Covered Bond Label Convention are intended to increase transparency, improve investor access to information, and improve liquidity in covered bonds, but they are not a substitute in any way for each User's independent investment and credit evaluation.

The Product Information on this Site is provided for your convenience only, and does not constitute any form of credit rating, an offer to sell (or the solicitation of an offer to purchase) any Product, nor does it constitute a recommendation, or investment advice (or any other type of advice) upon which reliance should be placed.

Completion of the relevant self-certification automated process by the Issuer will lead to the grant of the Covered Bond Label. The grant of such label is entirely within the control of the relevant Issuer, and we do not independently verify whether such Issuer complies with the relevant criteria. The existence of a Covered Bond Label does not represent any opinion by us about the creditworthiness of a Product, the value or price of a Product, the appropriateness of a Product's terms, or the Product's future investment performance. Nothing contained on this Site is intended to predict or project future performance.

We make no representation that the Products which are featured on the Site are suitable for you and we disclaim all liability and responsibility arising from any reliance placed on any Product Information or on the Covered Bond Label by any visitor to the Site or by anyone who may be informed of any of its contents.

C. Harmonised Transparency Template - Glossary

HTT 2025

The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	Definition
	OC Calculation: Statutory	Statutory Overcollateralisation is the overcollateralisation percentage required to be provided by each Issuer and included/disclosed in the national covered bond
HG.1.1	,	framework. Contractual Overcollateralisation is the overcollateralisation percentage each Issuer has contractually agreed to maintain pursuant to the covered bond programme
HG.1.2	OC Calculation: Contractual	Contractual overconateransation is the overconateransation percentage each issuer has contractually agreed to maintain pursuant to the covered bond programme documents.
	OC Calculation: Voluntary	Voluntary Overcollateralisation is the difference (if positive) between the actual overcollateralisation provided by an Issuer and the higher of the contractual and
HG.1.3 HG.1.4	Interest Rate Types	statutory overcollateralisation. Cover Assets: fixed until maturity and fixed with a periodic reset. Covered Bonds: fixed
110.1.4	**	
HG.1.5	Residual Life Buckets of Cover assets [i.e. how is the contractual and/or expected residual life defined? What assumptions eg, in terms of prepayments? etc.]	For the buckets concerning 'Residual Life' (G.3.4), we take into account all monthly principal payments, comparable to tabs D.9 and D.10. This is consistent with the G.3.4 title "Cover Pool Amortisation Profile". Hence, we do not use maturity buckets for Cover Assets. Further, no prepayments are taken into account.
HG.1.6	Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what conditions/circumstances? Etc.]	At the moment, only soft bullet has been issued. We only take into account the Maturity Date, not the Extended Maturity Date
HG.1.7	Maturity Extention Triggers	Belgian allows for "Failure to pay" and "Default"
HG.1.8	LTVs: Definition	As Belgium has general mortgages, we calculate LTV as the total borrower outstanding over the total borrower property value, resp. not indexed (M.7A.11) and indexed (M.7A.12)
HG.1.9	LTVs: Calculation of property/shipping value	Property values are those used in the loan underwriting procedure
	LTVs: Applied property/shipping valuation techniques, including whether use of index, Automated Valuation	Yearly updates of the property values are done using a national index calculated by the national institute of statistics in Belgium (StatBel).
HG.1.10 HG.1.11	Model (AVM) or on-site audits LTVs: Frequency and time of last valuation	Indexation is done on a yearly basis
110.1.11	Explain how mortgage types are defined whether for residential housing, multi-family housing, commercial	We filled in ND2 because the features of M.7A.13 refer to the underlying property and, because Belgium has general mortgages, it can not be applied to individual
HG.1.12	real estate, etc. Same for shipping where relecvant	loans as all properties cover for all loans.
	Hedging Strategy (please explain how you address interest rate and currency risk)	Interest rate risk is monitored using NPV tests described by the regulator (NBB). Hedging is currently done with overcollateral. There remains the possibility to use
HG.1.13 HG.1.14	Non-performing loans	swaps, as described in the Belgian covered bond legislation. No currency risk is expected as both assets and liaibilities are in euro. Loans that are more than 90 days past due.
110.1.14		Sale price of the properties is compared to the a statistical pricing model for Belgium. When the sale price is higher than the top range of the model outcome, an
HG.1.15	Valuation Method	expert valuation is done.
OHG.1.1 OHG.1.2	NPV assumptions (when stated)	The current interest is used; no parrallel shift of the interest rate curve is asssumed.
